When I suffered two strokes last Spring, the team at The Rehabilitation Center at Central Florida Regional Hospital helped me restore my independence and quality of life.

– Steve Sanchez, Deltona
A MESSAGE FROM OUR CEO

Every year as we prepare our Community Benefit Report, it is gratifying to see all the accomplishments and progress our team has made, and this year is no different. I hope that by spending a few minutes reviewing the pages of our 2014 Community Benefit Report, you will gain a better understanding of the many ways the work we do here benefits the health and wellbeing of our community.

Our commitment to quality continues to earn the recognition of leaders in the healthcare industry. Last year we received our third consecutive Top Performer on Key Quality Measures recognition from The Joint Commission as well as their Total Knee Certification. We were one of the first hospitals recognized by The American Heart Association Mission Lifeline program for STEMI care, and we earned the American Stroke Association’s Gold Plus Performance Award and the Action Registry’s Get With The Guidelines Silver Performance Achievement Award for Stroke Care.

We continue to work together to bring quality patient care to more people in our community. The opening of Oviedo ER in November 2013 has provided another access point for people in East Seminole County who are seeking care. Our Robotic Surgery program, which began early last year with gynecological patients, has now expanded to provide the da Vinci® Surgical System as a minimally invasive option for patients in need of general and urological surgery. And, by the end of 2013, the Rehabilitation Center at Central Florida Regional Hospital had helped more than 125 acutely ill and injured patients restore their independence and quality of life in its first months of operation – a service never before available in Seminole or West Volusia counties.

We have also made some significant changes we hope will improve the experience for patients choosing our hospital for their care. Central Florida Regional Hospital has completed necessary renovations that allow us to provide private rooms for all of our patients. And, with our new Patient Portal, patients now have access to their personal health information online following their stay.

I am proud of all we achieved last year, but even more so of the passionate people on our team who chose a career in healthcare, first and foremost, and I am honored they chose Central Florida Regional Hospital to pursue their passion. As we continue to plan the best way to serve our friends and neighbors in Seminole and West Volusia counties in the future, rest assured that the first priority for all of us is to provide the same compassionate care we would expect for our own loved ones.

Sincerely,

Wendy H. Brandon, FACHE

- Seminole County Public Schools
- Shepherd’s Hope
- The Foundation for Seminole State College of Florida
- The Salvation Army

IRON HEART COOK OFF

Central Florida Regional Hospital hosted the Fifth Annual Iron Heart Cook Off on Friday, October 18. WOFL FOX35 News Anchor Bob Frier hosted this year’s event with all proceeds benefiting the American Heart Association.

Competing for the Iron Heart trophy were defending champion Ratan Ahuja, M.D., William, David M.D., Robert Hooker, M.D. and Lawrence Vallario, M.D.

Each chef received an assortment of heart-healthy ingredients that had to be used in the dish they prepared. Members of Central Florida Regional Hospital’s cardiac care team worked for tips during the evening – all donations to the American Heart Association.

“As the leading provider of cardiac services in Seminole County, our team at Central Florida Regional Hospital is committed to providing not only high quality care to our patients, but also to educating our community on heart healthy lifestyle choices,” says Wendy Brandon, Chief Executive Officer, Central Florida Regional Hospital.

VOLUNTEERING

Volunteers donated 23,094 hours of service to the patients, visitors and staff of Central Florida Regional Hospital in 2013. The hospital currently has 166 volunteers and 131 are active.

In 2013 they provided support to Harvest Time International, Christian Sharing Center, Rescue Outreach Mission, Florida United Methodist Children’s Home, American Cancer Society, American Heart Association, Foundation for Seminole County Public Schools and individual employee scholarships for a total of $20,264.
HEALTH AND WELLNESS RESOURCES

Our hospital sponsors a wide range of community health information programs, screenings and seminars, which are posted on our hospital website CentralFloridaRegional.com in the community calendar section. Here too, you can find our online physician directory, where physicians can be searched by name or specialty, you can also find physicians who are credentialed to be on the hospital’s medical staff.

HEALTH PARTNERS
We partner with a wide range of resources, including HealthGrades and iTriage, to bring our communities the latest health information, quickly and conveniently. For information on downloading the iTriage mobile application, visit CentralFloridaRegional.com.

HURRICANE PREPAREDNESS
We offer one of the most comprehensive hurricane preparedness plans to ensure our patients and our staff who care for them are safe before, during and after a storm. HCA has contracts with vendors from around the state and nation to provide support from on-site security, to generators, to food. Transfer processes and plans with our network of hospitals across the country also exist should patients need to be relocated.

BENEFIT ENROLLMENT ASSISTANCE
We are committed to helping uninsured patients qualify for local and state health benefits programs. Our hospital offers on-site benefit education and Medicaid enrollment assistance.

SOCIAL MEDIA
Central Florida Regional Hospital has a social media presence to engage our patients and the communities we serve as fully as possible. Links to Facebook, Twitter, and other channels can be found on our hospital websites.

CONSULT A NURSE®
Free physician referral and health information are available around-the-clock by calling 1-800-445-3392. Registered nurses are available for consultation through this bilingual community service, which also registers people for the numerous community education classes and programs sponsored by Central Florida Regional Hospital.

h2u
Health to You (h2u) provides wellness solutions through its consumer and employer wellness programs. Currently, more than 1,400 individuals belong to the program at Central Florida Regional Hospital. Among the many benefits of membership are a Personal Health Assessment, online health portal and subscriptions to a monthly newsletter and quarterly magazine and a variety of exercise classes and health and wellness education events. Central Florida Regional Hospital offers a host of activities and events in our community for members to support social as well as physical health.

h2u also provides a program for employers enabling a wide range of health and wellness benefits for their employees. Living well and staying healthy are easier with a little help from h2u and this program will enable employers, both small and large, to select from a menu of health and wellness services to create a customized program for their employees.

The h2u program can provide the education, support and tools you need to achieve your health and wellness goals. Membership is just $20 per year. For more information visit www.h2u.com or call (407) 302-7385.

COMPANY CARE
Company Care delivers occupational health and worker’s compensation programs specifically tailored to the needs of any business or government organization. Services include:

- Case management to service the Worker’s Comp Network
- 24-hour access to medical care
- Managed care services
- Emergency care and follow-up for injured workers
- Injury prevention education
- Physical rehabilitation
- Diagnostic testing
- Pre-employment, executive and D.O.T. physicals
- Drug screening and physical exams
- Return-to-work programs
- Utilization review
- Nutritional counseling
Our Commitment to Excellence

Central Florida Regional Hospital shares the organization’s commitment to clinical excellence, safety and patient satisfaction. Our affiliation provides access to a vast clinical data warehouse, allowing us to adopt best practices to ensure the best possible outcomes for our patients.

PATIENT CENTERED CARE

Our hospital is saving lives, reducing complication rates and eliminating unnecessary costs through a strong focus on quality and patient safety. We are achieving and exceeding national clinical goals and benchmarks. These efforts are strongly supported by HCA’s Clinical Services Group, an industry leader in bringing evidenced based medicine to the bedside in community hospitals nationwide.

ELECTRONIC HEALTH RECORD

Healthcare is technology dependent, from our sophisticated diagnostic and treatment equipment to the elaborate information systems that gather, communicate and store results. For the past several years, we have been shifting all of our systems from the paper medical record process to the Electronic Health Record.

From simple x-rays to EKGs, the industry has transformed capturing images and storing information and data to a digital format. This has been a lengthy, complex and costly process in our rapidly changing healthcare landscape.

The hCare Clinical Portal allows physicians and other healthcare providers to login and access patient data from our hospital websites – from virtually any location where there is internet access. Whether at the office, home or another location, a physician can access needed clinical data.

QUALITY AND PATIENT SAFETY

“Patients First” is the foundation of our culture and passion for quality healthcare. An affiliate of HCA, the nation’s largest healthcare network with more than 163 hospitals in 20 states and England, Central Florida Regional Hospital shares the organization’s commitment to clinical excellence, safety and patient satisfaction. Our affiliation provides access to a vast clinical data warehouse, allowing us to adopt best practices to ensure the best possible outcomes for our patients.

CERTIFICATIONS AND RECOGNITION

Central Florida Regional Hospital is recognized as a Top Performer on Key Quality Measures by The Joint Commission. This honor was received by only 33% of the nation’s hospitals for industry-leading performance – and our facility is the only hospital in Central Florida to earn it for three consecutive years. Other achievements include:

- The Joint Commission Acute Care Accreditation, Joint Commission Primary Stroke Center Advanced Certification and Total Knee Certification
- Accredited Chest Pain Center with PCI from the Society of Chest Pain Centers
- Action Registry® – GWTG™ Gold Performance Achievement Award from the American College of Cardiology and the American Heart Association
- American Heart Association/American Stroke Association GWTG™ Gold Plus Performance Achievement Award
- American Heart Association Mission: Lifeline Bronze Award
- Laboratory CAP Accreditation
- Cardiopulmonary CAP Accreditation
- Cardiopulmonary CAP Rehabilitation Accreditation
- American Association of Cardiovascular and Pulmonary Rehabilitation Accreditation
- Blue Cross Blue Shield’s Blue Distinction Center Designation for Spine Surgery and Cardiac Care
- American Diabetes Association Certified Diabetes Education Program
- Accreditation by American College of Radiology (ACR) in mammography, Ultrasound, Nuclear Medicine, CT and MRI
- Mammography Quality Acts Certification
- Blue Cross/Blue Shield’s Blue Distinction Center Designation for Spine Surgery and Cardiac Care.
MEANINGFUL USE PATIENT PORTAL

During 2013, a great deal of preparation was done in order to launch the Meaningful Use (MU) Patient Portal in early 2014 across the organization. The goals for the portal are to improve the patient experience, encourage patient engagement, and create the technology foundation for meeting MU Stage Two requirements.

The MU Patient Portal will be available online, on-demand and will reflect select portions of the patient’s medical record at the hospital.

Benefits to the patient will include empowerment to become more actively involved in their care, and improving care coordination and communication between patients and their healthcare providers.

SAVING LIVES THROUGH FLU SEASON PREPARATION

HCA is a leader in making hospitals safer for patients and visitors through our flu vaccine initiative. By providing free vaccines to our staff and requiring vaccinations of health workers with direct patient contact, we are making our hospitals safer. When a vaccine is not possible, the caregiver must wear a mask.

SEPSIS PROGRAM

Severe sepsis is now one of the most common causes of death in ICUs nationally. We are aggressively working to reduce this patient safety threat through hospital and community-wide focus on early recognition and management.

DATA AVAILABLE IN THE PATIENT PORTAL

- Allergies and Conditions
- Medications
- Hospital Visit History
- Upcoming Hospital Appointments
- Laboratory Results
- Continuity of Care Document (CCD)
- Radiology Reports
- OE Departmental Reports
- Discharge Instructions
- Discharge Summaries

MAKING OUR HOSPITALS SAFER FOR MOTHERS & CHILDREN

Improving patient safety for our expectant mothers, babies and children has been a key focus in our hospitals nationally.

We are very proud to have teamed up with the March of Dimes and other national organizations by participating in initial research studies to minimize or eliminate elective deliveries before 39 weeks pregnancy (gestation). Study results showed a positive impact on the health of babies and today this is a standard practice in our hospitals.

Our emergency rooms, hospital nurseries and pediatric units are equipped with the Broselow System, a sophisticated medication safety program to ensure the proper dosing and administration of drugs to infants and children.

As an affiliate of HCA, we are very proud to be part of the first US healthcare system to perform a blood test to screen newborns for kernicterus, which can cause permanent brain damage and physical impairment. Today this screening is a standard, dramatically reducing the incidence of this preventable, life altering condition.
SPECIALIZED CARE

EMERGENCY EXCELLENCE
Highly skilled emergency physicians and nurses combined with best practices and the latest technology benefitted over 51,000 patients in the Central Florida Regional Hospital emergency room last year. Protocol driven care that can begin in the field through direct communications with local EMS teams, and meeting stringent standards to earn Chest Pain Center Accreditation with PCI and Primary Stroke Center Certification by The Joint Commission are all part of our commitment to improve quality at Central Florida Regional Hospital’s emergency room.

Our strong focus on enhancing care and improving ER processes has also dramatically reduced wait times to below national averages. You can find our average ER wait times posted on our hospital website, by text messaging “ER” to 23000 or by viewing our billboards located on I-4 in Lake Mary and Sanford.

HEART & VASCULAR NETWORK
Central Florida Regional Hospital provides comprehensive cardiac and vascular care services to the community by combining the talents of our cardiologists, electrophysiologists, radiologists, cardiothoracic and vascular surgeons. Our program provides a Cardiovascular and Neuro unit featuring 78 private rooms, a 12-bed progressive care unit, a 12-bed cardiovascular intensive care unit and two specially designed, fully staffed and equipped operating suites reserved exclusively for cardiovascular surgery. In addition, two state-of-the-art digital catheterization labs for invasive studies, an electrophysiology lab, non-invasive cardiology services and cardiac rehabilitation make Central Florida Regional Hospital the only full-service cardiac facility in Seminole and West Volusia counties.

OVIEDO ER
Oviedo ER, a 24/7 freestanding emergency room, offers all the resources you need for acute care of a serious illness or injury. The 11,000-square-foot facility located at 8300 Red Bug Lake Road in Oviedo between S.R. 417 and S.R. 426 brings comprehensive emergency services that are available at Central Florida Regional Hospital in Sanford to the residents of East Seminole County. Our Oviedo ER features 24/7 adult and pediatric emergency care, 12 private patient care beds, a dedicated trauma room, diagnostic imaging including CT scan, ultrasound and x-ray, laboratory services, physicians specializing in Emergency Medicine on site 24/7 and full-time employees including nurses certified in Advanced Cardiac Life Support and Pediatric Advanced Life Support.

Oviedo ER’s first patient, 21-month-old Jameson Plourde, arrived via Oviedo Fire Rescue Station 46 at 8:15 a.m. on November 25, 2013. His parents were grateful for the quick and efficient care their son received. “We appreciate the gracious people and staff who cared for Jameson. We are happy to have such a great facility in Oviedo,” said Georgia and Clark Plourde.
CARDIAC REHABILITATION
The Cardiac Rehabilitation program at Central Florida Regional Hospital is designed to improve cardiovascular function and endurance. It is safe and beneficial for both men and women of all ages. With a combination of exercise, education and making heart healthy choices, cardiac rehabilitation can improve the patient’s or individual’s sense of well-being and quality of life. Available on an inpatient or outpatient basis, individuals appropriate for the program include those who have experienced:

- Heart disease such as angina, heart attack or heart failure
- Coronary bypass surgery, balloon angioplasty or stent placement
- Heart transplant
- Stable angina

CARDIOPULMONARY SERVICES
Respiratory Therapy – Services include a full range of inpatient and outpatient respiratory care including pulmonary function testing, metabolic exercise stress testing, breathing treatments, oxygen evaluation including pulse oximetry and arterial blood gases.

Non-invasive Cardiac Diagnostic Services – Services include a wide range of cardiac testing for inpatients and outpatients, therapeutic treatments, EKGs, transthoracic echo, transesophageal carotid ultrasound, cardiac stress testing and holter monitoring.

CARE ASSURE
Care Assure was created to ensure cardiac patients receive appropriate care following hospital visits. Our clinically trained Nurse Navigator supports cardiac patients after discharge from the hospital by answering questions and facilitating follow-up appointments.

By taking a broad view of patient care, Care Assure helps to improve management of heart disease during the transition from the hospital back into the community.
CANCER CARE
Cancer is the second leading cause of death in the country, and Central Florida Regional Hospital is committed to meeting and exceeding the many standards required for the American College of Surgeons Commission on Cancer by going through the cancer accreditation process. To become accredited in cancer services, the hospital has committed to regular meetings of the Cancer Committee and monthly cancer conferences which includes surgeons, medical oncologists, radiation oncologists, pathologists, radiologists and hospital clinical and support staff to proactively review patient cases.

STROKE WARNING SIGNS
If you notice one or more of these signs, don’t wait. Stroke is a medical emergency. Call 9-1-1 for emergency medical services. Get to a hospital right away!
The American Stroke Association wants you to learn the warning signs of a stroke:
- Sudden numbness or weakness of the face, arm or leg, especially on one side of the body
- Sudden confusion, trouble speaking or understanding
- Sudden trouble seeing in one or both eyes
- Sudden trouble walking, dizziness, loss of balance or coordination
- Sudden, severe headache with no known cause

NEUROHEALTH SCIENCES AND SPINE CARE
Central Florida Regional Hospital offers comprehensive neurohealth services, including stroke, spine and movement disorder programs, neuro-oncology services, and functional magnetic resonance imaging. The spinal program offers both comprehensive and minimally invasive services such as spinal compression fracture repair for osteoporosis.

In addition, our spine care team provides a comprehensive approach to back pain treatment and recovery for both chronic and degenerative conditions.
ADVANCED SURGICAL SERVICES
Our Surgical Services Department performs a full range of procedures, from the most complicated cases to minimally invasive laparoscopic surgery, on both an inpatient and outpatient basis.

Our surgical specialties include general surgery, gynecology, cardiovascular surgery, colon & rectal, podiatry, thoracic and vascular surgery, neurosurgery, orthopedics and urology.

ROBOTIC SURGERY
Central Florida Regional Hospital offers a wide range of surgical options, including minimally invasive surgery with the da Vinci® Surgical System. The da Vinci System provides our surgeons with enhanced capabilities, including high-definition 3D vision and a magnified view. Though it is often called a “robot,” the da Vinci system cannot act on its own. The surgery is performed entirely by the surgeon controlling the da Vinci System, which translates all hand movements into smaller, more precise movements of tiny instruments inside the patient’s body.

The da Vinci System allows our surgeons to perform complex procedures through just a few tiny openings. As a result, patients can get back to their normal activities sooner, without the usual recovery time following major surgery.

IMAGING SERVICES
Central Florida Regional Hospital provides a comprehensive array of outpatient imaging services. Our facility is equipped with a broad range of diagnostic technology.

- CT
- 64-slice CT
- Coronary Calcium Scoring
- DEXA Bone Density Scan
- Echocardiogram
- EKG
- Fluoroscopy
- Interventional Radiology Procedures
- Digital Mammography
- MRA/MRI
- Nuclear Medicine
- PET/CT Scan
- Stereotactic Breast Biopsies
- Ultrasound
- X-Ray

THE BABY SUITES
Central Florida Regional Hospital has welcomed more than 23,000 babies over the past 31 years. The birth of a baby is a special time and should happen in a special setting. Our delivery suites combine the comfort of a beautifully decorated room with the personalized services that you deserve. Post-partum suites are private and our convenient location makes it easy for growing families in Seminole and West Volusia counties to be together at this important time.

In addition we provide:

- Nurses who are certified in neonatal resuscitation and fetal heart monitoring
- 24-hour epidural anesthesia coverage
- Dedicated cesarean section surgical suite
- Prenatal education classes
DIABETES CENTER
Central Florida Regional Hospital’s diabetes program has been awarded the prestigious American Diabetes Association (ADA) Education Recognition Certificate for providing a quality self-management education program to our community.

In addition, we provide monthly diabetes education classes. To learn more, or to find out about our free diabetes education classes, call 407-321-4500 ext. 5249.

THE REHABILITATION CENTER
The Rehabilitation Center provides intensive inpatient therapy for patients recovering from any medical condition that requires the rehabilitation process to achieve the highest level of independence. The only program of its kind in Seminole or West Volusia counties, this unit features large private rooms, a physical therapy gym, speech therapy and a home care therapy area.

WOUND CARE
Central Florida Regional Hospital’s Wound Care Center specializes in the treatment of non-healing wounds such as arterial insufficiency, venous insufficiency, diabetic foot ulcers and resolution of wound complications caused by radiation therapy.

Our team specializes in the care of chronic wounds. It is our goal to provide individualized interventions for each patient.
